

Swing®

hand-drawn, cord- and electrically operated
for consistent pleats in curtains

Practical solution for classic elegance

hand-drawn, cord- and electrically operated

for consistent pleats in curtains

practical & stylish

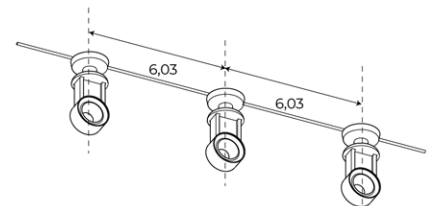

Straight hemmed curtains with attractive, identical folds? SWING makes it possible. Your curtains will always fall in identical S-shaped folds, even when fully closed. In addition, washing your curtains is a lot easier!

With the SWING system, a band of snap fasteners is attached to the curtain with which it can easily be fitted on SWING gliders. SWING gliders are always kept at the same distance apart by a smart, invisible cord worked into in the track. As a result, the curtain always falls in identical S-shaped folds, even when fully closed. The SWING system has even more advantages:

- The black-out lining can be fitted and washed separately from the curtain.
- A curtain can be hung on each side of the gliders so that an elegantly finished curtain can be seen from the front and back.
- The curtain can easily be removed from the gliders, for example, for washing the fabric.
- The click-in gliders can even be washed with the curtains.
- SWING can be used with Qurails hand-drawn, cord-operated and electrically powered curtain systems, and with most track types.

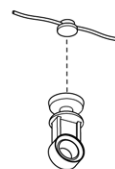

Glider distance

Swing gliders

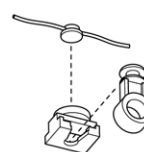

4014-10 glider

- max. 0.5 kg per glider.
- max. curtain weight < 10 kg.
- max. curtain width 5 m

4014-11 click-in glider

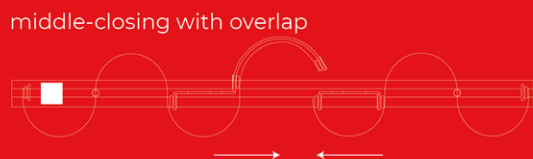

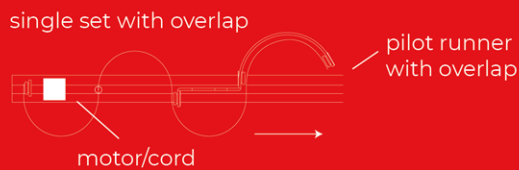

- max. 0.5 kg per glider.
- max. curtain weight and width depends on the selected curtain track system.
- easy to click in and out of the track, making the curtain easy to remove.
- can be dry cleaned or laundered along with the curtain fabric.

Application example

The pilot runner with overlap always starts with an inward curve. With middle-closing curtains, this creates an attractive overlap. The pilot runner without overlap always starts with an outward curve. The curtain fabric always ends with an outward so that the cord or motor is covered in cord-operated and electric track systems.

Specification guide

Mounting:

Mount the heart of the track at least 10cm from the wall. We advise against using anodised tracks.

The gliders are suitable for profiles:

4100, 4200, 4700, 4701, 4702, 5100, 5300, 5600, 6200.

Tailoring:

With the SWING system, the way in which the curtain falls depends on the selected fabric. SWING is ideal for floor-to-ceiling fabrics.

For more information about this system, go to our website: www.qurails.com

Standard parts

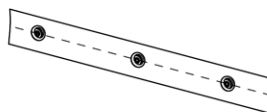

Curtain transport

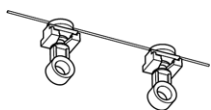

4014-10-080
glider swing (2-sided) on
cord, white

Band

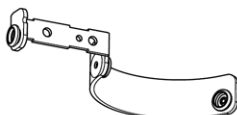

4014-20-108
band with snap fasteners,
white, transparent, black

Optional parts

4014-11-080
click-in glider swing (2-sided)
on cord, white

6274-30SW-L
pilot runner Swing complete
with overlap left (for 6200)

5674-10SW-L
pilot runner Swing complete
with overlap left (for 5600)

5374-10SW-L
pilot runner Swing complete
with overlap left (for 5300)

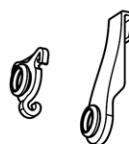

5174-10SW-L
pilot runner Swing complete
with overlap left (for 5100)

4074-10SW-L
pilot runner Swing complete
with overlap left for hand-
drawn curtains (not for 5600
or 6200)

6074-10SW-L
pilot runner Swing complete
with overlap left (for hand-
drawn curtains hung on a
5600 or 6200)

6274-30SW-R
pilot runner Swing complete
with overlap right (for 6200)

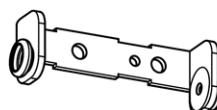

5674-10SW-R
pilot runner Swing complete
with overlap right (for 5600)

5374-10SW-R
pilot runner Swing complete
with overlap right (for 5300)

5174-10SW-R
pilot runner Swing complete
with overlap right (for 5100)

4074-10SW-R
pilot runner Swing complete
with overlap right for hand-
drawn systems (not for 5600
or 6200)

6074-10SW-R
pilot runner Swing complete with
overlap right (for hand-drawn
curtains hung on a 5600 or 6200)

6275-30SW
pilot runner Swing complete
without overlap (for 6200)

5675-10SW
pilot runner Swing complete
without overlap (for 5600)

5375-10SW
pilot runner Swing complete
without overlap (for 5300)

5175-10SW
pilot runner Swing complete
without overlap (for 5100)

Pilot runner sets include roller hooks (except for hand-drawn systems) that are available in white and natural metallic.
